2024 - Current

C2perform - Software Developer

I am working as a Software Developer at C2Perform, I create and maintain web solutions for businesses and organizations using HTML, CSS, PHP, JavaScript, JQuery, Ajax, Elasticsearch, and MySQL. C2Perform is a leading provider of Call Center solutions that enhance the performance and productivity of the workforce.

2022 - 2023

Millennium Infotech - Full Stack Developer & PHP Developer

2017 - 2022

Perk Annex, Evega Technologies LLP - Web Developer & Application Programmer

During my tenure as an Application Programmer at Evega Technologies LLP in Hyderabad, Telangana, India, from December 2017 to December 2022, I accumulated extensive experience in web authoring tools, web development, Google Analytics, web design, web scraping, databases, server-side development, and data extraction. I specialized in utilizing web authoring tools and development frameworks to create robust web applications, emphasizing functionality and user experience. Google Analytics enabled me to analyze user behavior effectively, optimizing website performance and engagement. I also excelled in web design, crafting user-friendly interfaces, and developed web scraping solutions for automated data extraction. My role included managing databases, ensuring efficient data storage and retrieval, and implementing server-side components to support application functionality. My expertise in data extraction involved transforming raw data into actionable insights, contributing significantly to project success and organizational advancement at Evega Technologies LLP.
